V2.3.0	2018-03-15	<ul style="list-style-type: none"> Added the optical module features. Added the certification information. Added the packing information.

Introduction

The CVT320 is a fiber converter used for conversion between optical signals and electrical signals. It is ready to use once it is connected, with no drivers required.

Features

- 1x Gigabit Ethernet port
- 1x Single-mode twin-core LC optical port with an optical module installed at the factory
- Optical port: 1.25 Gb/s rate, 1310 nm wavelength, up to 15 km transmission distance, hot pluggable

Appearance

All product pictures shown in this document are for illustration purpose only. Actual product may vary.

Indicators

Indicator	Color	Status	Description
POWER	Red	Always on	The power supply is normal.
FX/ACT	Green	Always on	The optical port connection is normal.
TP/ACT	Green	Always on	The Ethernet port connection is normal.
DATA	Green	Flashing	The Ethernet port is outputting data.

Dimensions

Tolerance: ± 0.1 Unit: mm

Specifications

Electrical Specifications	Input voltage	AC 100-240 V, 50/60 Hz
	Rated current	0.7 A
	Rated power consumption	3.5 W
Operating Environment	Temperature	-20°C to +70°C
	Humidity	10% RH to 90% RH, non-condensing
Storage Environment	Temperature	-30°C to +80°C
Physical Specifications	Dimensions	149.3 mm x 132.0 mm x 38.0 mm
	Net weight	0.53 kg
Packing Information	Carrying case	335 mm x 190 mm x 62 mm, kraft paper box
	Foam	330 mm x 180 mm x 5 mm (Top) 330 mm x 180 mm x 53 mm (Bottom)
	Packing box	400 mm x 365 mm x 355 mm, kraft paper box
Certifications	KC, CE, PSE, EAC, FCC, IC	

FCC Caution

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
